

## 3M™ Dissipative Rubber Mats and Rolls 8800 Series

Dissipative Rubber Mats and Rolls 8800 Series are constructed using a top layer of static dissipative neoprene rubber laminated to a bottom layer of conductive neoprene rubber. Both layers are made from vulcanized synthetic rubber, which offers resistance to oil, grease and most common solvents. They offer increased resistance to heat and hot solder as compared to vinyl or olefinic materials. Non-standard sizes are available on a custom order basis. Compatible with 3M™ Constant Monitors.
